

LIVING ENVIRONMENT SYSTEMS

MELRent

The rental solution that provides aid fast in an emergency, and gives you reliable heating and cooling when you need it. All from a single provider.

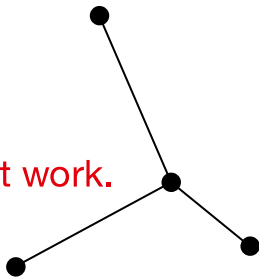

Ready when you need it: rented heating and cooling systems from Mitsubishi Electric

New: MELRent is the flexible way to rent heat pumps and chillers for heating and cooling. It is perfect when you need a quick fix in an emergency or as a temporary solution in a project. Delivered and ready to operate in just 24 hours, this simple and reliable solution offers incredible benefits, billed at transparent, fixed weekly prices.

Our rental service offers you an **all-round package** from your initial enquiry to return. A central contact partner is here to guide you through the entire process, ensuring a smooth experience and guaranteeing the quality you are used to.

MELRent is ready when you need it!

Knowledge at work.

MELRent 

The benefits speak for themselves:

- **Monitoring:** We monitor the system remotely to ensure smooth operation. This lets us stay on top of things and intervene proactively before any irregularities arise in the operating process.
- **Lightning-fast reactions:** If a problem occurs, our Full Service will quickly provide emergency support.
- **Energy efficiency that pays off:** Our systems improve your energy consumption and protect your bottom line. Our rental service is no different.
- **Maximum flexibility** with heating and cooling from a single system. Exclusive to Mitsubishi Electric.
- **Full cost transparency** right from the start, enabling long-term, predictable cost certainty.
- **Simple commissioning** through our own service team.
- **Wide range** of accessories supplied with the system, all of which can be easily integrated.
- **Dedicated contact partner** and a comprehensive service network that is here to help at any time.

Fast, flexible, reliable

Whether for spontaneous use as a substitute system for a day, temporary heating or cooling for a few weeks, or a longer-term option over several months, MELRent creates the right climate all year round. Our service combines both heating and cooling in a single efficient solution.

MELRent: reliable heating and cooling for temporary structures

MELRent lets you create comfortable working conditions during renovation and expansion projects, or in containers on building sites. Reliable and easy to use, this service lets you order heating and cooling whenever you need them, and delivers them on time. It is also ideal for event locations or ice rinks.

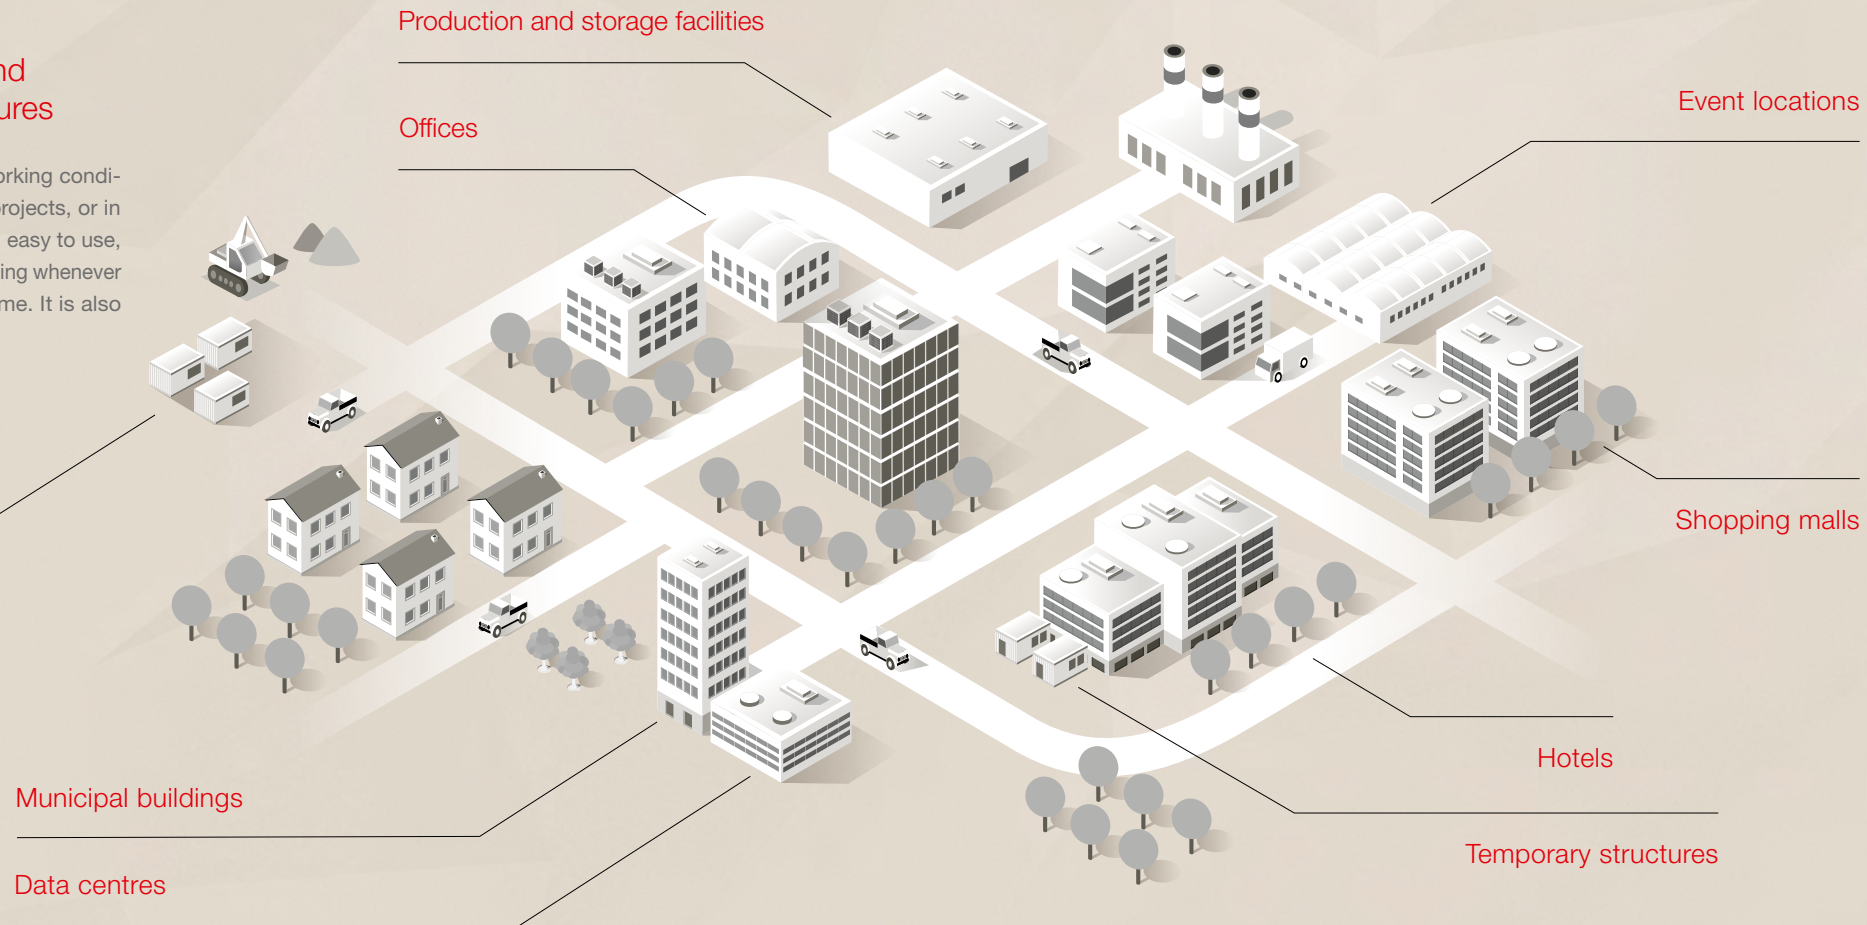

Construction site organisation

MELRent: a flexible solution for temporary capacity expansion

MELRent is also a cost-effective way to cover temporary peaks in demand for cooling or heating. It is ideal for manufacturing and storage facilities in industries ranging from food production, chemicals and agriculture to office buildings and many more environments. MELRent can also be used separately.

MELRent: quick help in an emergency

MELRent offers 24-hour reliability in an emergency and can help in a variety of environments when your existing cooling or heating systems fail. It can keep things running smoothly until your existing systems are back up and running.
